SUBJECTS

GENERAL

Aluminaut. H. E. Sheets and R. R. Loughman.... 450

AERODYNAMICS OF BODIES, COMBINATIONS, AND INTERNAL FLOW

A correlation of high subsonic afterbody drag in the presence of a propulsive jet or support sting. H. McDonald and P. F. Hughes.... 202
Aerodynamic stability considerations of high-pressure ratio, variable-geometry jet nozzles. J. S. Alford and R. P. Taylor.... 308
Experimental investigation of a novel VTOL thrust vectoring nozzle. Gordon R. Hall.... 312
Afterbody flowfields and skin friction on short duct fan nacelles. Robert L. Lawrence.... 318
Effect of inlet additive drag on aircraft performance. Joseph S. Mount.... 374
Some recent aerodynamic advances in STOL aircraft. G. W. Johnston.... 390
Effect of pressurization on airplane fuselage drag. Dezso Gyorgyfalvy.... 531
Examination of an aerodynamic coupling phenomenon. Richard F. Porter and James P. Loomis (EN).... 553

AERODYNAMICS OF WINGS, ROTORS, AND CONTROL SURFACES

Theoretical aerodynamics of one-lobed flexible parawings at low speeds. Jack N. Nielsen, Anthony R. Kriebel, and Frederick K. Goodwin.... 127
Propeller at high incidence. John De Young.... 241
Numerical method of estimating and optimizing supersonic aerodynamic characteristics of arbitrary planform wings. Wilbur D. Middleton and Harry W. Carlson.... 261
Dihedral effect of a flexible wing. William P. Rodden.... 368
Results of some recent hydrofoil work. Alan C. Conolly.... 443
A method of representing fan-wing combinations for three-dimensional potential flow solutions. Richard E. Monical.... 527
Subsonic induced drag. Karl L. Sanders (EN).... 347
Multitapered wings. B. Saelman (EN).... 348
Solution of an integral occurring in propeller theory. William A. Middleton (EN).... 000

AIRCRAFT

X-22A design development. Vincent B. Paxhia and Edward Y. Sing.. 2
Some important design considerations on the XC-142A triservice V/STOL. H. M. Gaebe.... 9
Influence of fan and ducting characteristics on the stability of ground effect machines. Norman K. Walker.... 25
The neutral point in stability and control analysis. Edward J. Rodgers.... 33
A system to vary the stability and control of a deflected-jet, fixed-wing VTOL aircraft. Frank A. Pauli.... 39
Effects of tread wear on the wet runway braking effectiveness of aircraft tires. Trafford J. W. Leland and Glenn R. Taylor.... 72
Design and operating considerations of commercial STOL transports. Curt A. Holzhauser, Wallace H. Deckert, Hervey C. Quigley, and Mark W. Kelly.... 87
Lift fan V/STOL concept for future applications. J. M. Peterson.... 94
Cost analysis as an aid to aircraft design. Edward H. Yates.... 100
Peripheral fans for GEM. Peter R. Payne.... 233
Development highlights of the C-141 StarLifter. F. A. Cleveland and R. D. Gilson.... 278
Variations of landing distance of fixed-wing aircraft in STOL operations. Paul A. Puvrez.... 288
A method for calculating the effect of aircraft maneuvers on sonic booms. Charles J. Bartlett and Manfred P. Friedman.... 353
Problems unique to VTOL automatic flight control. Leo J. Mueller.... 357
Aircraft design: present and future. George S. Schairer.... 361
Some effects of stability on low-altitude ride quality. Donald L. Grande and Noah D. Showalter Jr.... 379
Summary of flight load environmental data taken on B-52 fleet aircraft. John B. Dempster and Clarence A. Bell.... 398
Technological contributions of the CH-53A transport helicopter development program. Edward S. Carter Jr.... 430
Current and advanced X-15. E. W. Johnston.... 493
Investigation of the application of direct translational control to VTOL aircraft. J. T. Gallagher and F. B. O'Donnell Jr.... 493
Operational concept of the integrated helicopter avionics system. E. T. Hogan and R. L. Nadeau.... 493
A new method for numerical integration of airplane equations of motion. J. Roskam (EN).... 56
Some applications of performance optimization techniques to aircraft. S. K. Landgraf (EN).... 153
An evaluation of the far field overpressure integral. Raymond M. Hicks and Joel P. Mendoza (EN).... 154
Reply by author to second comment by I. L. Ashkenas. R. C. A'Harrah (TC).... 57
Erratum: "Some opportunities for progress in aircraft performance." George S. Schairer (TC).... 58

Comment on "The neutral point in stability and control analysis." Patrick J. Roache (TC) ... 352
Reply by author to P. J. Roache. Edward J. Rodgers (TC) ... 352

FACILITIES, RESEARCH, AND SUPPORT

Research on VTOL aircraft handling qualities criteria. David P. Miller and James W. Clark ... 194
Research in the application of windshield projection displays to the all-weather landing task. Theodore Gold and Joseph D. Workman ... 328
NOL hydroballistics facility. V. C. D. Dawson (EN) ... 350

FLUID DYNAMICS

Measurements of fluctuating air loads on a circular cylinder. L. V. Schmidt ... 49
Some aerodynamic and operational problems of STOL aircraft with boundary-layer control. Joseph J. Cornish III ... 78
An approach to turbulent incompressible separation under adverse pressure gradients. Fabio R. Goldschmied ... 108
Experimental model studies of non-Newtonian soluble coatings for drag reduction. S. Thurston and R. D. Jones ... 122
Experimental and theoretical performance of a supercavitating hydrofoil operating near a free surface. J. O. Scherer and J. Auslaender ... 144
Laminar flow control by suction as applied to the X21A airplane. Rudediger E. Kosin ... 384
Development of a BLC high-lift system for high-speed airplanes. L. B. Gratzer and T. J. O'Donnell ... 477
Investigation of the diffusion characteristics of supersonic streams composed mainly of boundary layers. J. W. Cnossen and R. L. O'Brien ... 485

HEAT TRANSFER AND THERMODYNAMICS

Thermal stress and instability of sandwich cylinders on rigid supports. R. A. Gellatly, P. P. Bijlaard, and R. H. Gallagher ... 44
Thermal conductance in spotwelded titanium joints. J. N. Nylander, R. R. June, and J. B. Kelly ... 297
Assumptions underlying the "thin-skin" heat-transfer approximation. Eugene E. Covert (EN) ... 255
An analytical model for predicting thermal response in honeycomb sandwich panels. P. J. Kendall and J. I. Gonzalez (EN) ... 551
Erratum: "Assumptions underlying the 'thin-skin' heat-transfer approximation." Eugene E. Covert (TC) ... 557

INSTRUMENTATION AND PHOTOGRAPHY

Recent developments in pressure altimetry. William Gracey ... 161
Altimetry aspects of automatic altitude reporting. Herbert J. Sandberg ... 166
An automatic stall prevention control for supersonic fighter aircraft. R. H. Cook ... 171
Use of recorders in future aircraft operations. Edward A. Driessen, Hendrik C. Vermeulen, and Karel H. Ledeboer ... 176
In situ oxygen and carbon dioxide sensors for oceanography. A. Edward Wheeler (EN) ... 463

MATERIALS, NONMETALLIC

Structural fiber glass aircraft component-program results. Lloyd E. Hackman, Charles L. Stotler, D. Gene Worthington, and Ross J. Molella ... 216

MATHEMATICS

Computer flight planning in the North Atlantic. Leroy Simpson, Douglas L. Bashioum, and Edward E. Carr ... 337

METEOROLOGY

Erratum: "Sample estimates of B-66B low-level, clear-air gust field parameters." K. D. Saunders (TC) ... 58

NAVIGATION AND GUIDANCE

Analytical methods of research into terminal area air traffic operations. Robert W. Simpson ... 185

PROPULSION

Vectored thrust engines for single and multiengined aircraft. T. P. Frost and R. A. Bishop ... 13
PT6 turboprop for general aviation. J. P. Beauregard ... 20
Nuclear-powered surface effect ships design problems. Rodolfo A. Montes de Oca and Harry M. Simpson ... 136
An application of hydropneumatic propulsion to hydrofoil craft. John D. Pierson ... 250
Diffusion in a supersonic compressor stator by means of aerodynamic control. Vito D. Agosta ... 302
Tests to establish flow distortion criteria for lift engines. B. I. Tyson ... 411
Status report on liftjets. C. T. Hewson and K. R. Davies ... 417
An evaluation of lift engines in tactical VTOL aircraft. Daniel H. Jacobson ... 424
Propulsion by undulating plates. M. Botman ... 456
A method of determining propulsion system requirements for long-range, long-endurance aircraft. J. A. Bogdanovic, A. Feder, and R. J. Wheaton ... 499

STRESSES AND LOADS

Transfer matrix representation of flexible airplanes in gust response study. Y. K. Lin ... 116
Buckling of sandwich panels under nonuniform stress. R. A. Gellatly, P. P. Bijlaard, and R. H. Gallagher ... 224
A full-scale structural fatigue test program. R. N. Ketola ... 407
An experimental investigation of flutter of a fully submerged subcavitating hydrofoil. H. Norman Abramson and Guido E. Ransleben Jr. ... 439
Aerothermoelasticity: its impact on stability and control of winged aerospace vehicles. John H. Wykes and Robert E. Lawrence ... 517

STRUCTURAL DESIGN

Minimum weight design with structural reliability. Harold Switzky ... 228
Structural analysis flexible grid technique for SST wing parametric studies. R. E. Miller Jr. ... 257
Acoustical design features of Boeing model 727. George T. Gebhardt ... 272
Designing for structural reliability. Harold Switzky ... 509
Efficiency of waffle grid panels under compressive loading. George S. Johnston and Robert B. Lantz (EN) ... 437

SUPERSONIC TRANSPORTS

Practical considerations in commercial supersonic transport flight operations. Donald W. Richardson ... 66
Structural materials for supersonic transport. G. A. Fairbairn ... 208
Performance tradeoffs and research problems for hypersonic transports Thomas J. Gregory, Richard H. Petersen, and John A. Wyss ... 266
Effect of variable sweep on supersonic transport handling qualities. H. C. Higgins and H. A. Shomber ... 465
Low-speed aerodynamic characteristics of the double-delta supersonic transport. R. L. Foss, W. M. Magruder, I. Litrownik, and D. R. Wyrick ... 470
